Rati Vardiashvili - rvardiashvili@constructor.university

Anactacia Lomtadze - alomtadze@constructor.university

Ani Nikoladze-Janiashvili - anikoladzejaniashvili@constructor.university

Have you ever wondered how music not only defines the melodies of your life but also speaks about your personality? Recent research reveals a captivating link between the music we love and the traits that define us.

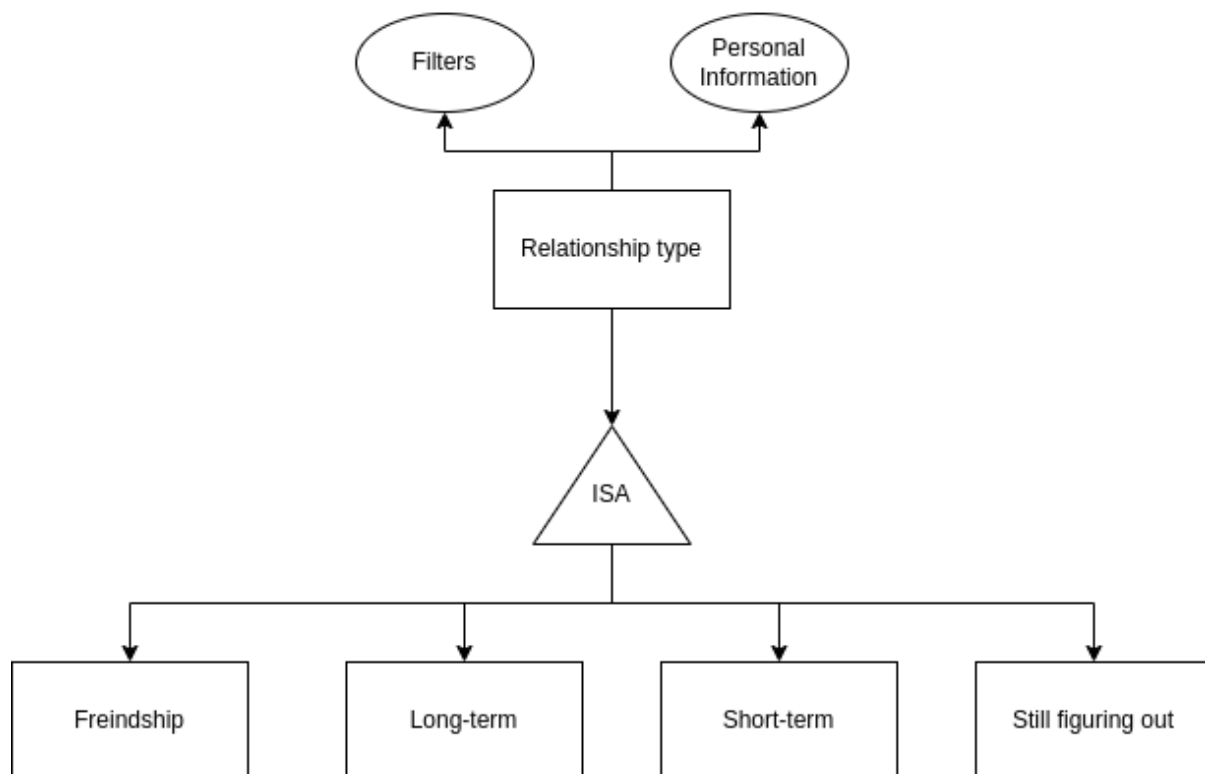

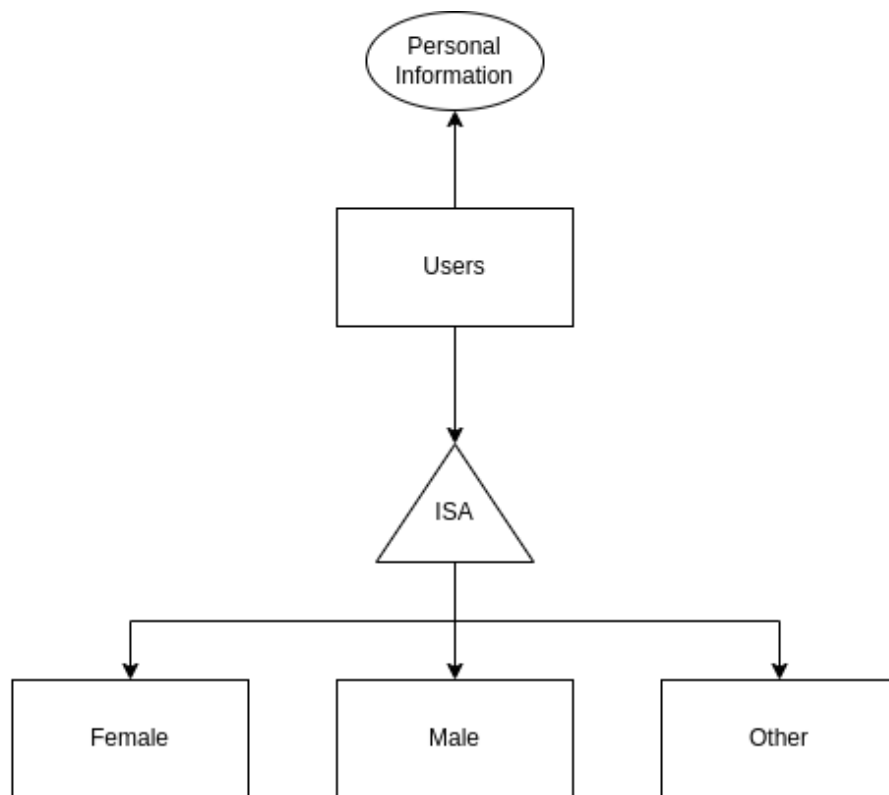

Think back to those moments when you heard a song that seemed to communicate directly to your heart. Music has this ability to touch our deepest emotions, to transport us to another time and place, and to connect us with our innermost feelings.

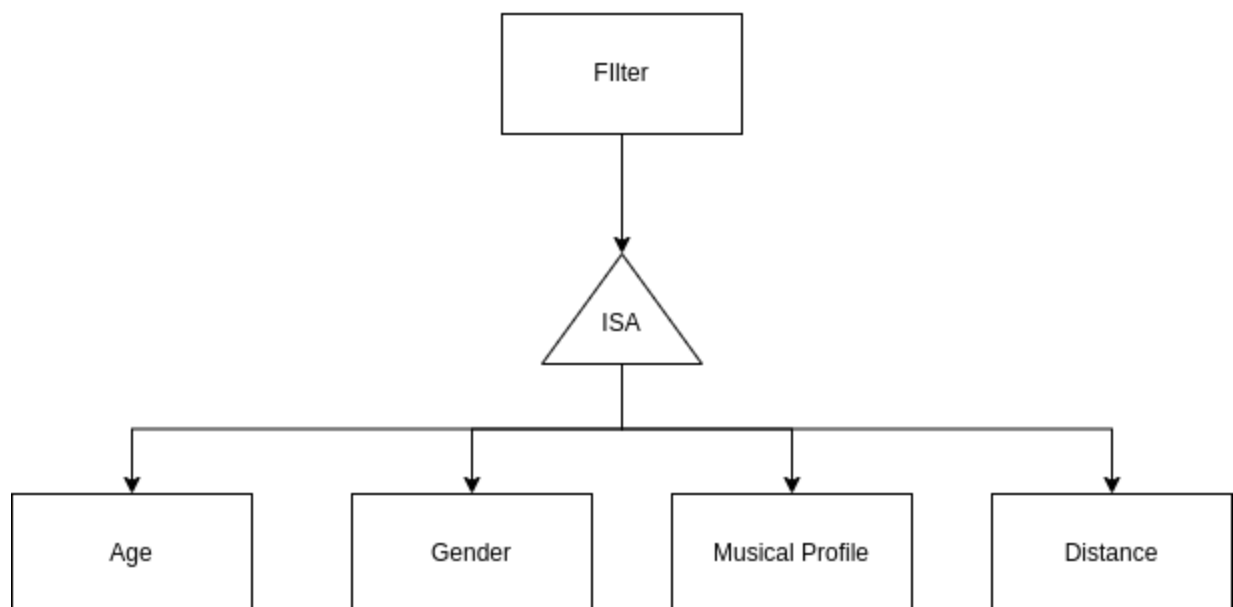

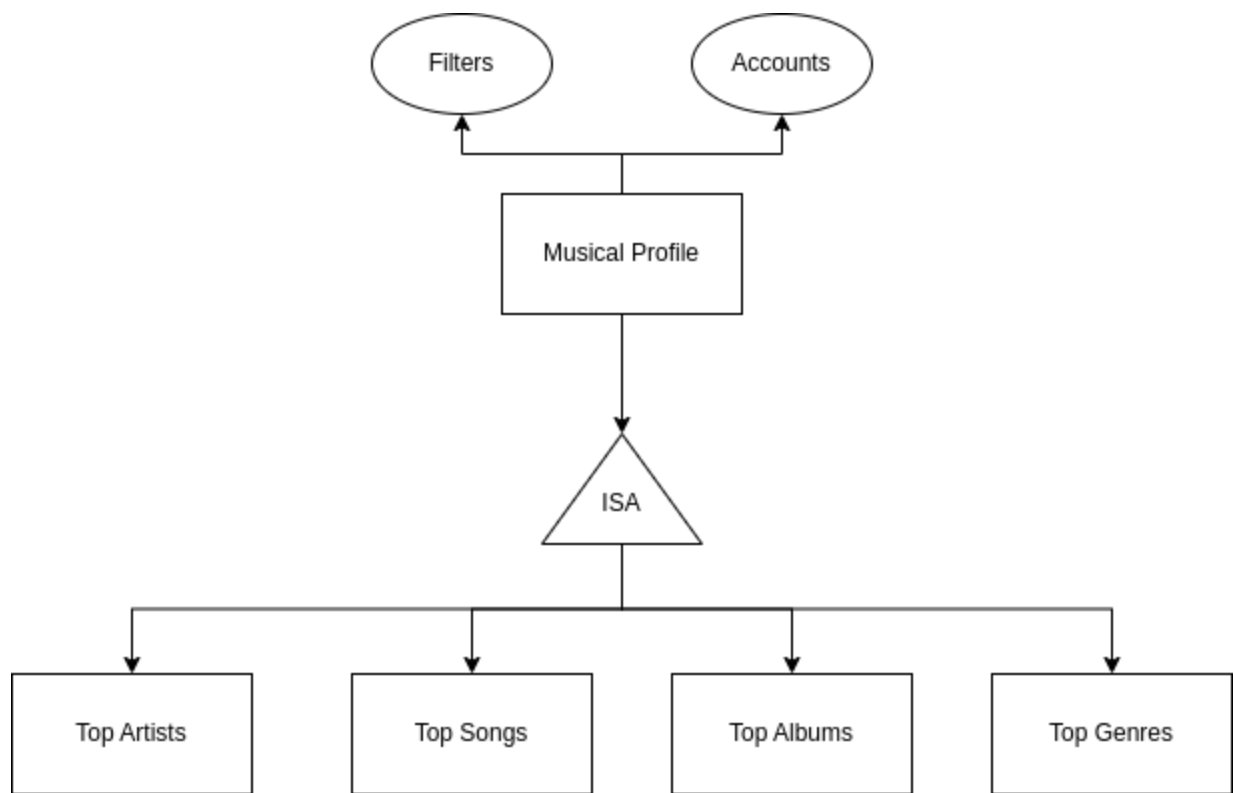

Now, imagine a place where music isn't just background noise but the very foundation of relationships. That's what "BeatBond" is all about.

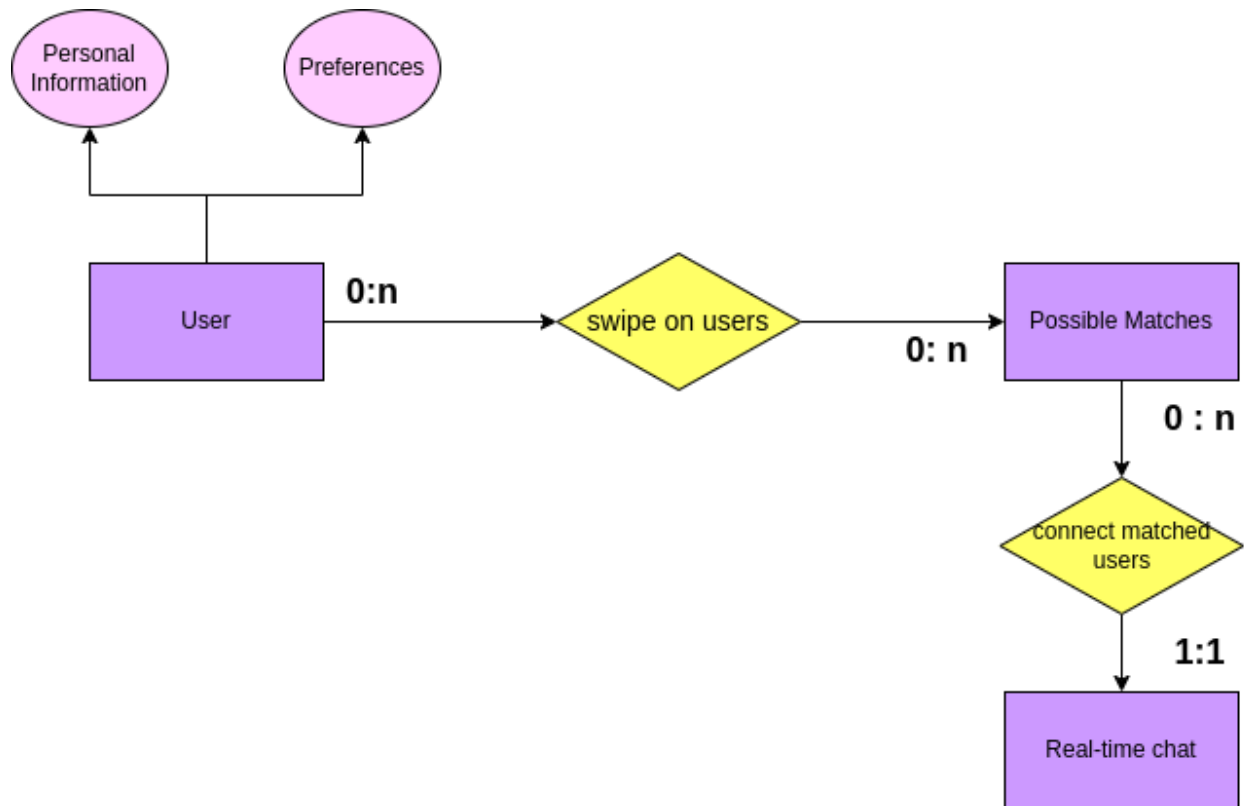

BeatBond is a web application that brings people together based on their musical preferences. It syncs with Spotify, Apple Music, and YouTube Music to match users with friends or potential partners who share similar tastes. Users can discover new connections and chat in real-time, all while sharing playlists.

Since our application is a social platform, it is intended to be used by music lovers (18+). There will be a login page, where users can sign up via their emails and connect their preferred musical platforms. When logged in, users can see a list of matched profiles, with whom they can match and chat. Their musical profile will be updated daily, or they will have an option to manually update it.

Welcome to "BeatBond" - where music connects hearts.

How the user interacts with the system:

- 1) Visit BeatBond and tap Create Account
- 2) Enter your email (and other personal information) and verify
- 3) Connect an account - connect your Spotify, Apple Music, or YouTube music account
- 4) Set up your profile/preferences(choose gender/relationship type/musical preferences/age range/distance)
- 5) Allow BeatBond access to all required permissions

What does the user see, what actions can s/he take, what are their results:

If the user swipes and matches with someone based on their music taste, they can see each other's preferences, linked music platforms (Spotify, Apple Music, YouTube music) and what they're listening to.

They can download/like each other's songs/albums and start chatting in a real-time chat, where they vibe with each other.

Illegal input/actions:

- 1) Respect for individual boundaries is crucial, as people's comfort levels differ. We prohibit nudity, sexual content and discussions of sexual desires. However, in private conversations, these topics are acceptable as long as all parties involved are comfortable with them.
- 2) Zero-tolerance policy towards any content that includes graphic depictions or descriptions of violence, harm to humans or animals, the use of weapons, or the promotion of glorification of self-harm.
- 3) Focus on forming genuine personal connections rather than business-related ones. Avoid platform to advertise, promote, share your social media profiles for the purpose of gaining followers, sell products, fundraise, or campaign for any cause.
- 4) Promote respectful communication: we strictly prohibit behaviors such as harassment, threats, bullying, intimidation, doxing, sextortion, blackmail, or any actions intended to cause harm.
- 5) Only adults allowed: you must be at least 18 years of age or older to use BeatBond.
